Market rate

On a quarterly basis, the Wisconsin Department of Administration assesses the market rates on which the CWFP and SDWLP subsidies are based. Effective April 1, 2024, the market rate for loans of 20 years or less will remain at 3.90% and the market rate for loans longer than 20 years and of up to 30 years will remain at 4.10%.

Subsidy

Most eligible project costs are funded at a percentage of the market rate, in accordance with ch. 281, Wis. Stats., and chs. NR 162 and 166, Wis. Adm. Code. The CWFP and SDWLP provide subsidy to buy down the market rate on loans to the reduced interest rates described in the table shown above. The fixed interest rate applied to the loan is based on the market rate in effect on the day the municipal governing body signs the financial assistance agreement (loan).

Some municipalities may also be eligible for additional subsidy in the form of principal forgiveness (PF), which is comparable to a grant because it reduces the size of the loan, thus reducing annual principal and interest payments.
