RE: Wetland Delineation Confirmation for an Approximately 160-Acre Project Review Area, located in the NW ¼ of Section 36, Township 29N, Range 09E, in the Town of Easton, Marathon County

Dear Mr. Colton:

We have reviewed the wetland delineation report from Merjent Inc. prepared for the above-mentioned site. This letter will serve as confirmation that the wetland boundaries shown on the enclosed revised wetland delineation figure are acceptable. This finding is based upon a field visit September 6, & 7, 2022. Any filling or grading within these areas will require DNR approvals. Our wetland confirmation is valid for five years. Be sure to send a copy of the report, as well as any approved revisions, to the U.S. Army Corps of Engineers.

In order to comply with Chapter 23.321, State Statutes, please supply the department with a polygon shapefile of the wetland boundaries delineated within the project area. Please do not include data such as parcel boundaries, project limits, wetland graphic representation symbols, etc. If internal upland polygons are found within a wetland polygon, then please label as UPLAND. The shapefile should utilize a State Plane Projection and be overlain onto recent aerial photography. If a different projection system is used, please indicate in which system the data are projected. In the correspondence sent with the shapefile, please supply a brief description of each wetland's plant community (eg: wet meadow, floodplain forest, etc.). Please send these data to Calvin Lawrence (608-266-0756 or email at calvin.lawrence@wisconsin.gov).

There is a mapped intermittent waterway in the northwest portion of the project review area. This waterway within the project review limits has been determined not to be a navigable waterway. The waterway may become navigable downstream but within the project review limits the waterway is not navigable.

If you are planning development on the property, you are required to avoid take of endangered and threatened species, or obtain an incidental take authorization, to comply with the state's Endangered Species Law. To ensure compliance with the law, you should submit an endangered resources review form (Form 1700-047), available at <https://dnr.wi.gov/topic/ERReview/Review.html>. The Endangered Resources Program will provide a review response letter identifying any endangered and threatened species and any conditions that must be followed to address potential incidental take.

In addition to contacting WDNR, be sure to contact your local zoning office and U.S. Army Corps of Engineers to determine if any local or federal permits may be required for your project.

If you have any questions, please call me at (715) 415-4916 or you can reach me by email at Travis.Holte@wisconsin.gov.

Sincerely,

Travis Holte
Wetland Identification Specialist
