\*Jack Pine includes small volume of red pine and tamarack.

\*\* Red Maple includes small volume of birch and aspen.

Biomass harvesting is not allowed.

### Scaled Sale

**Minimum Bid Value = \$10,530.00**

### Special Operating Requirements and Slash Disposal:

1. This sale is located within the 25-mile Heterobasidion Root Disease (HRD) buffer area, and requires stump treatment unless harvested between December 1 and March 31. *Treatment must be performed by a Certified Pesticide Applicator. Treatment involves chemically treating all fresh-cut stumps of pines of merchantable size by applying either CELLU-TREAT (disodium octaborate tetrahydrate) or Rotstop C (biological fungicide). Treatment shall be made as soon as possible and no later than one day after harvest and a dye product shall be added to liquid solutions for inspection purposes. The cost of this application can vary based on application method and harvest conditions; but should be considered when submitting bids on these timber sales.*
2. All pine products cut between March 1<sup>st</sup> and August 30<sup>th</sup> must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15<sup>th</sup>.
3. Minimize damage to advanced regeneration!
4. Approximately 13 acres of this sale are located on wet ground that will require frozen or extremely dry conditions.
5. Whenever State Forest recreational trails are used or crossed by logging equipment or trucks, any damage must be repaired to the satisfaction of the DNR Parks staff.
6. Sale area bounded by red paint line, marsh/wetland, recent cuts, ATV/Snowmobile Trail, and town road.
7. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

### General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.
5. Any new roads and all landings must be approved by a DNR Forester before operations begin.
6. Contractor will be required to close off access roads upon completion of sale to Forester's satisfaction.
7. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.
8. Notify DNR Forester (Ian Remus 715-928-2462) before you start the job and each time you leave or return to the job.
9. Contact the town of Komensky prior to beginning logging operations at 715-299-0093. Permits are required for hauling heavy loads on town roads and approvals are needed for any new driveway approaches.
10. Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.
