3. No pole length skidding will be allowed in selection areas, pine thinnings, or spruce thinnings.
4. No cutting can be done during the months of April, May, or June in selection harvests due to bark being more easily damaged at these times.
5. The Department of Natural Resources reserves the right to stop operations if unreasonable, excessive, or avoidable damage occurs or will occur. The contractor may be held responsible to repair any or all damage.
6. The Department of Natural Resources may change, suspend or terminate any timber sale contract or portion of contract with no penalties to the State if errors in timber sale planning or designing cause or may cause serious environmental damage, or may cause aesthetic concerns, or are not sound silvicultural practices, or violate any county, state, or federal law or regulation.

13. State forest roads may be posted for longer periods of time than county and township roads.

14. The purchaser will be required to restrict or suspend hauling during periods when the compacted road surface would be damaged. Hauling will be suspended if it is causing rutting into the subgrade, or surfacing material would be displaced, such as during heavy rainfall or spring break-up freezing and thawing cycles.
15. When sap-peeled pulpwood is scaled, 12.5% will be added to hand peeled and stroke delimeter/processor peeled volume, and 16% will be added to ring debarked volume. Scale ticket must state if the load is a peeled product.
16. Contractor is responsible for having mill tickets and scale slips returned to the Flambeau River State Forest Office within 30 days of hauling.
17. Contractor is required to close roads at designated map locations by placing rocks, stumps and/or cull log barriers. (See Attachment A). Any road, landing, or primary skid trail used for a timber sale will need to be closed according to Attachment A.
18. Do not damage or remove trail/roadway signage. (See Attachment B).
