2023	1.0364	1.0364	1.0741
2024*	1.0364*	-	-

Inflation factors are derived from the most recent implicit price deflator for gross domestic product published by the U.S. Department of Commerce in its *Survey of Current Business* (www.bea.gov/scb). The annual inflation factor is the result of dividing the latest published annual deflator by the deflator for the previous year.

As Required by ss. NR 520.07(5) and NR 664.0142(2), Wis. Adm. Code

^{*} Until the third estimate is published around March of the following year, the annual inflation factor is assumed to be the same as for the previous year.
