

# How to Use the Well Driller Viewer

[https://dnrmaps.wi.gov/H5/?viewer=Well Driller Viewer](https://dnrmaps.wi.gov/H5/?viewer=Well%20Driller%20Viewer)

1) Zoom into the location where you plan to drill the well using any of the following methods:

- Double click on the map directly OR
- Click the blue “Search By” button to zoom into a:
  - o County
  - o Township, Range and Section
  - o Latitude and longitude
  - o City, town or village
- Choose the Zoom In + tool bar button and draw a box OR
- Move the cursor and scroll the mouse wheel OR
- Use your fingers to zoom in on a tablet or phone

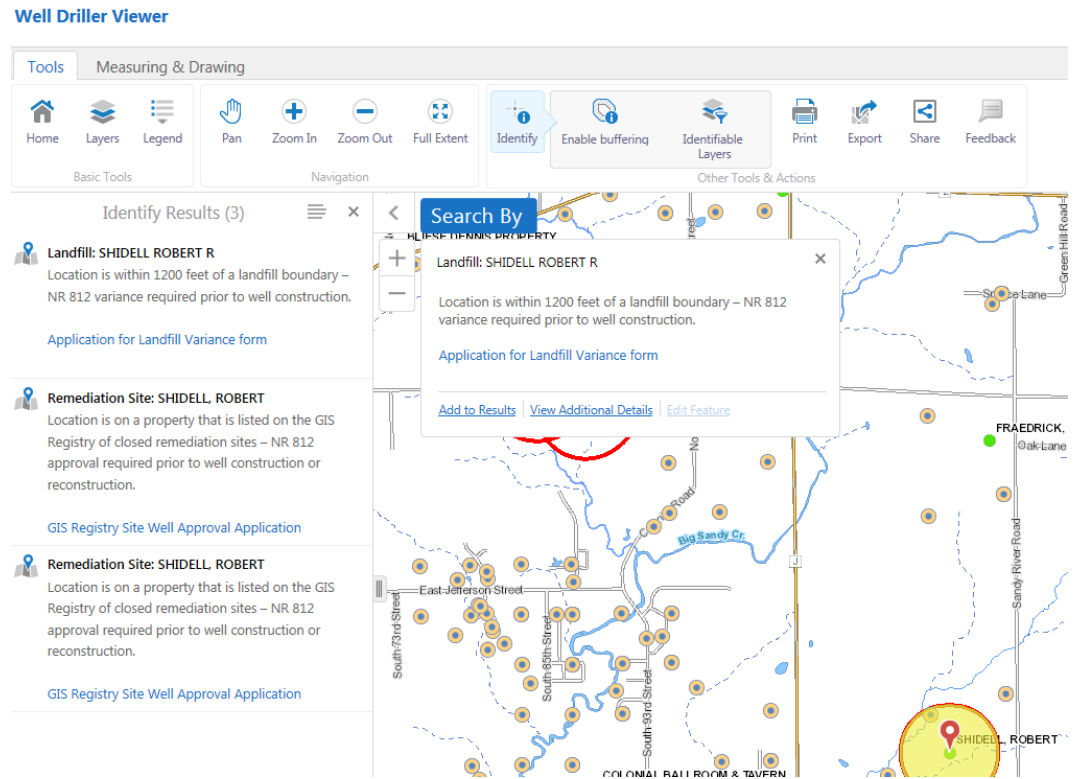

2) Click the “Identify” tool then click on the location where you plan to construct the well.

**Tip:**  
Click on the Layers toolbar icon to see what each map symbol indicates.

3) Potential issues will appear on the left, under “Identify Results”. For each issue, read the implications. If you are in doubt, contact your DNR Private Water Specialist.

- Landfills
- Remediation Sites
- Special Well Casing Areas
- Dual Aquifer

4) Well construction reports from 1988-present are available for private wells. Zoom in close (1:50,000) until the brown circles appear. Click the Identify tool and click on a dot. A link to the well construction report will appear.
